

LL.M. (POST-MASTER)

LL.M. in Aviation Law

European School of Law (ESL)

Co-funded by the Erasmus+ Programme of the European Union

Programme director: Laurent GROSCLAUDE

OVERVIEW

The aviation sector is experiencing tremendous growth in a globalized and highly competitive environment. Air traffic is set to double by 2030, especially in Africa and the Asia-Pacific region. Private entities and public institutions are both involved in the complex challenges – combining public policies, private interests and global issues – that are facing the sector. Regional and international regulation authorities, airlines and alliances, airports operators, aircraft manufacturers, ground-handling firms all have to deal with a growing number of complex challenges and have to deal with a growing number of legal and regulatory issues. In this context, the demand for qualified legal expertise is booming.

For half a century, Toulouse, France, has been home to major international aeronautic players (Airbus, ATR..) and the most renowned centre for education and research in the aerospace sector (ISAE-Supaero / ENAC). The University of Toulouse Capitole and its European School of Law offers cutting-edge programs, fully taught in English, and widely recognized in the business world.

Objectives:

This LL.M. brings solid expertise and delivers appropriate solutions to aviation sector players. With 300 hours of in-class teaching – a set of comprehensive modules addressing the major current issues in aviation law – and many academic and industrial partnerships, this LL.M. is unique worldwide. It takes a strategic and interdisciplinary approach to the main legal challenges within this field and is designed both for graduate students and for top executives. The modules combine academic knowledge with professional expertise in order to meet the needs of major players worldwide.

ACADEMIC PROGRAM

The LL.M. includes 300 hours of teaching and seminars divided into 2 core modules and 4 specialized modules. All modules are mandatory to obtain the LL.M. degree. Courses are offered in sessions of three to five days, approximately once a month. Participants also have either to complete an internship or to conduct a group-work project under academic or professional supervision. Standalone modules and courses are available on demand and subject to special arrangements.

This LL.M. does not confer the diploma of Master but is designed for applicants already holding a Master degree or equivalent diploma, or a professional experience.

60 credits – 300h CM

CORE MODULES – 120 hours – 30 credits

Core module 1 – Aerospace legal framework – 65 hours

- Private international law (15 hrs)
- Dispute settlement (litigation / ADR / Arbitration) (15 hrs)
- Public international law (10 hrs)
